Build great lenses, your eyes will surprise your friends on social media. Use dozens of filters for hair and eyes, creating unique images and images. Try a few filters - your look is memorable. The results will be stored in the device gallery. Hair change and eye color is a good photo editing app that lets you see what you'd look like if you re-colored your hair or use eye color changing contact lenses. Working with the app is enjoyable. Downloads: 10 000 000 + Customers rating: (3.9 / 5) Eye Color Studio It's no secret that you can easily change the color of your eyes just bybuying a set of lenses. But if you don't want to worry about buying lenses, but want to surprise someone with a new eye color, you can use a simple, convenient application called Eye Color Studio. With its help you can change the color of the eye to any of the collections and it will look very natural (the main thing is to do it with too much shine). Once the app starts, it automatically opens a pre-prepared model, where you can now try on different eye colors. To insert your photo, click the new photo button and select Gallery if you want to select a photo from the gallery, or the camera if you want to take a photo. After selecting the photo, you need to select your eye contour. Here you need to be very careful and attate because if you choose a blink of an eye contour, the result will be the same. Your task is to select the eye (without an eyelid) and then choose the shape of Iris (don't worry if it's big, as long as it covers the whole Iris in the photo and anything that will come out will automatically be cut off as you've chosen the eye shape). Once the contour setting is finished, select one of the eye categories and enjoy the result. For natural looks rather superimposed, use the slider on the right to reduce/increase the transparency of superimposed photos. To compare the result with the original, click the Compare button. To finish the magic, click the Finalize button. Eye Color Studio is an easy way to really surprise someone just by changing the color of their eyes. Good for you! Downloads: 10 000 000 + Customer Rating: (4.0/ 5) NiceEyes NiceEyes – Eye Change Color is an excellent Android photo editing tool. Mainly the editor is designed to adjust the color of the eye in the photo. There's a lot of color changes, so everyone will find something to make his eyes look with. In addition to color solutions, the app offers for deformation to different options. So, you can enter the cat or snake's eye, increase the size of the lizard, enter the fire into the eyes or rainbow. There are many design options. In addition to deformation and eye color, NiceEyes – Eye Color Changer has a classic photo editor with a minimal set of tools. Photos can be stored directly in the gallery. The editor is connected to social networks so you can instantly share your newly processed photos with friends and like comments and likes. The interface is very convenient. It is mainly represented by examples of eye changes. Each sample is a perfect combination of different shapes and colors. There are many changes that do not need to be combined manually. When editing low-quality photos, changes will seem unnatural. So you need to edit photos only in high resolution. In addition, the tool is completely free with a collection of more than a hundred sample variations. Downloads: 10 000 000 + Customer Rating: (4.3/5) Eye Color Change – Photo Network Eye Color Change – Network Photo Software that allows you to easily change the color of your eyes in photos. The app uses a unique method of mixing colors so that your new eye color looks natural. It works well with dark, light-colored eyes. You can also remove the red-eye effect. You can share results on social networks. Eye Color Change – Photo network can be used as a collage maker. With it you can create beautiful collages and photo networks. You can adjust contrast, warmth, brightness, tint, saturation. There are more than 30 unique works. Downloads: 5 000 000 + Customers rating: (3.9/5) Unfortunately teeth don't always look white on the photo, so they should be whitened with special editors. Here's a selection of the best tooth bleach apps for Android. 12 best tooth bleach apps for Android Eye Change Color Editor This is a simple tool intended to change the color of the eye on photos instantly. If you've ever dreamed of bright blue or green eyes, you can make that dream come true now! And don't be upset that this is only possible in the photo. However, if you are fascinated by the look of the image, you can go to the store and buy the same eye color lenses and surprise everyone with your eyes! Eye Lens Photo Editor offers different eye color styles and color lenses. The program uses a unique blending technique so that your new eye color looks natural. So, make your eyes the most beautiful, stylish and attractive! You can make your look look more glamorous you can have bright blue eyes, green eyes, loose eyes, red eyes, purple eyes, even cat eyes! Easy motion control. With your fingertips, you can change the size of your eyes, adjust opacity. They place different lenses on the left and right eyes to create an unusual effect.
